

Environmental Policy Statement

As part of achieving our Vision, namely becoming “*a mining operation that values our employees, their welfare, our business reputation and ensures minimal adverse impact on the environment*”, BMTJV has adopted an Environmental Management System based on ISO 14001. As a consequence, a key focus for BMTJV relates to the environmental sustainability associated with the operations. We believe that everyone has the right to expect, as well as the obligation to contribute to an environmentally sustainable work environment. To achieve this, everyone needs to work together at their appropriate levels, so as to ensure that we continuously improve our performance and make the site a better place to work. To achieve this

Bluestone will:

- Seek continuous improvement processes and prevention of pollution in the environmental performance and culture of the workplace environment.
- Set and review environmental objectives and targets in an effort to minimise our environmental footprint.
- Communicate and consult with employees and other stakeholders
- Comply with legal and other requirements related to the tasks performed and the site in general.
- Provide an environment where all workers feel they can freely discuss or report all incidents.

Employees will

- Commit to assisting in identification of any environment issues that may arise or come to their attention.
- Participate in programs that will, from time to time, be put in place to correct a highlighted environmental risk.
- Assist in improving our reputation in the environmental area by active participation and support of improvement processes.
- Do nothing that would detract from the achievement of our Vision

Allan King
General Manager
